

Kid-Man®

Medical mattresses Built for professional care

Certified materials for safe & hygienic patient care

MADE
IN
LITHUANIA

Premium
Quality!

Core materials

- Medical-grade polyurethane foam compliant with relevant medical device requirements.
- Designed for effective pressure redistribution and pressure ulcer prevention, except the standard mattress model.
- Resistant to professional disinfection; foam core can be disinfected up to +105 °C.

Protective cover

- Fully enclosed, fluid-resistant, flame-retardant and breathable cover.
- Oeko-Tex® Standard 100 certified and resistant to bacteria and mites.
- U-shaped zipper with protective flap and reinforced corners.
- Washable up to +95 °C, autoclavable up to +120 °C and tumble dryer safe up to +70 °C.

Mattress attributes:

Medical device
compliant

Custom sizes
(up to 200 cm)

Roll-packed
Easy to transport

Cover attributes:

Hypoallergenic

Fluid -
resistant

Flame -
retardant

Breathable
materials

U-shaped zipper
with protective flap

Washable
up to 95°C

Autoclavable
up to 120°C

Oeko-Tex®
Standard 100

MEDAS

Reliable standard for everyday care

Pressure ulcer prevention scale:

- Comfortable and reliable support for everyday patient care
- Suitable for low-risk patients
- Available in different foam densities and heights

Core: Durable polyurethane foam, 25 or 35 kg/m³.

Height, cm: 10 - 14

Density kg/m³: 25 - 35

Width, cm: 90

Length, cm: 200

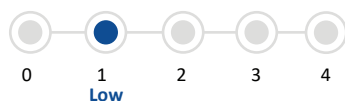

Find more information
about all sizes via QR code.
Or search in www.kid-man.com

KUBA

Low-risk pressure ulcer prevention

Pressure ulcer prevention scale:

- Castellated surface improves pressure redistribution
- Three-zone design supports the head, torso and legs
- Open structure promotes airflow and helps reduce moisture

Core: High-density elastic foam, 35 kg/m³.

Height, cm: 11

Density kg/m³: 35

Width, cm: 90

Maximum load, kg: 110

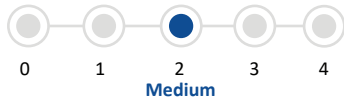

Length, cm: 200

Weight, kg: 7

VISKO

Medium-risk pressure ulcer prevention

Pressure ulcer prevention scale:

- Dual-layer construction for effective pressure redistribution
- Viscoelastic top layer adapts to body contours
- Stable high-elasticity base for support and durability

Core: 60 kg/m³ viscoelastic foam + 38 kg/m³ high-elasticity foam.

 Memory foam

Height, cm: 14	Density kg/m ³ : 60 / 38
Width, cm: 90	Maximum load, kg: 140
Length, cm: 200	Weight, kg: 12

VISKODU

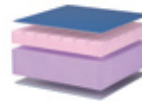

High-risk pressure ulcer prevention

Pressure ulcer prevention scale:

- Enhanced dual-layer system for improved pressure redistribution
- Thicker viscoelastic layer reduces peak pressure and tissue stress
- Stable base provides support during prolonged use

Core: 60 kg/m³ viscoelastic foam + 42 kg/m³ high-elasticity foam.

 Memory foam

Height, cm: 15	Density kg/m ³ : 60 / 42
Width, cm: 90	Maximum load, kg: 200
Length, cm: 200	Weight, kg: 13

VISKOTRYS

Very high-risk pressure ulcer prevention

Pressure ulcer prevention scale:

- Advanced three-layer construction for maximum pressure redistribution
- Multi-layer system improves immersion, envelopment and support
- Profiled structure promotes airflow and helps reduce shear and friction

Core: 60 kg/m³ viscoelastic foam + 37 kg/m³ middle layer + 42 kg/m³ supportive base.

 Memory foam

Height, cm: 15	Density kg/m ³ : 60 / 37 / 42
Width, cm: 90	Maximum load, kg: 240
Length, cm: 200	Weight, kg: 14

Reusable absorbing pad SORBI for patient & nursing person convenient.

Protective, reusable pad designed to absorb fluids and help keep the bed surface dry and hygienic. Soft materials provide comfort, while side flaps help keep the pad securely in place.

Gentle materials

Top layer absorbs 3.0 l/m²

Fluid - resistant

Reusable up to 200 times

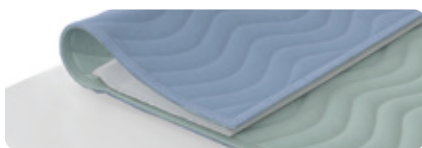

Washable up to 90°C

Oeko-Tex® Standard 100

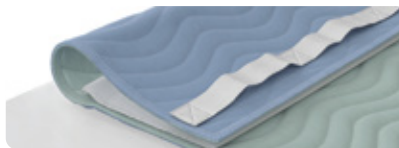

Medical device compliant

Standard absorbent pad

REF: HL-7200

Size: 60 × 34 × 10 × 7 cm

With handles for easier repositioning

REF: HL-7200_RANK

With handles & low-friction base for repositioning & transfer.

REF: HL-7200_SL
