

Regia

For living at home
just the way you wish

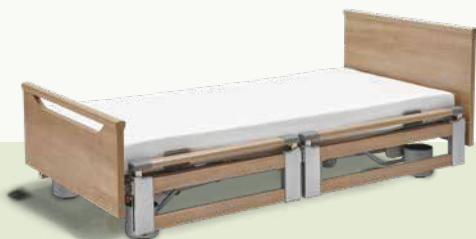

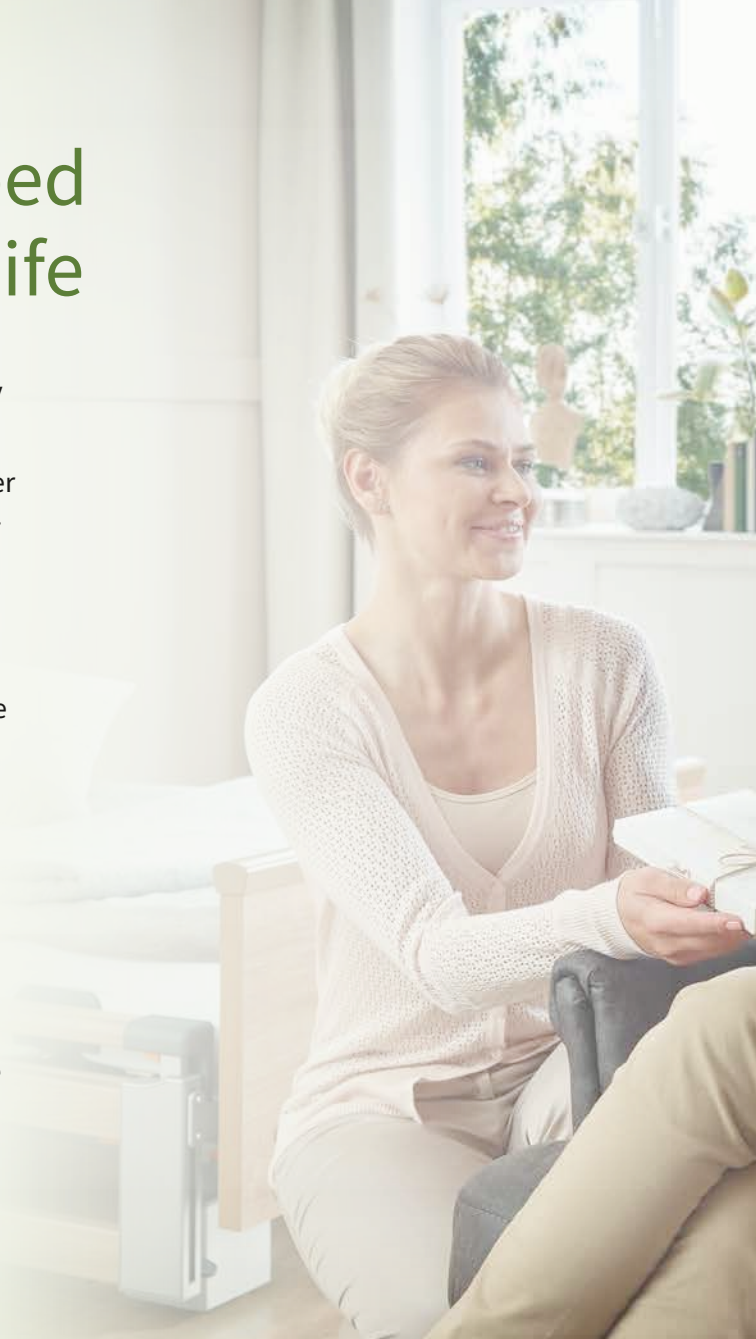

Regia – the perfect bed for an independent life

Everyone has their own story to tell. Some people enjoy their retirement full of energy, while others look for enhanced support following illness or an accident. Other people just want to know they are all set up – no matter what the future brings. The Regia bed accompanies you on this journey.

By combining comfort, safety and stylishness in just one bed while looking as cosy as any other bed, it has so much more to offer as well. It helps you to get up, saves your back and makes you feel safe yet independent thanks to its flexible height – every day, year after year.

The Regia grows to meet your requirements – from a stylish luxury bed for your active years to affording practical day-to-day assistance and becoming a reliable partner for your care needs. A bed that fits your life – not the other way round.

Cover: Regia with Primus headboard and Primus-Low footboard in Havana Cherry decor.

- **Large height adjustment range:**
26 - 80 cm
- **High safe working load:**
225 kg
- **Individually adjustable:**
 - Mattress base width 90 or 100 cm
 - Telescopic split safety side for flexible protection
 - Easy Switch for quick no-tool assembly of safety sides, headboard, footboard and panels

Attractive fabrics

Headboards and footboards are available with attractive upholstered fabrics. Where split safety side elements have not been included, you can also use panels in a wood, fabric or leather look. In this way, the bed fits every style of home design.

Contents

- 4 Regia
- 5 Double bed: Regia partner
- 7 Safety sides
- 8 Easy Switch system
- 10 Comfort functions
- 12 Decors, fabrics, headboards and footboards
- 15 Mattresses
- 16 Accessories
- 18 Equipment

Stylish faux leather

If the Regia is covered all round with stylish faux leather, it no longer looks like a care bed. Users nevertheless enjoy all the advantages of an electrically adjustable bed. Safety sides or elements in a different look can be retrofitted at any time. This lets the bed change to keep pace with your requirements.

Regia partner double bed

- **Flexible senior bed for couples:**
 - Individually adjustable mattress base rests
 - Comfortable sitting position
 - The two halves of the bed can easily be separated and put back together again

The elegant Regia low-height bed can be adapted to meet every comfort and protection need.

Regia

Comfort without compromise

A bed that adapts to your needs

People who stay active want to enjoy every comfort at home, too – without compromising on style. With its **attractive fabrics, elegant wood decors** and **stylish leather looks**, the bed becomes a real designer piece that fits perfectly in every bedroom.

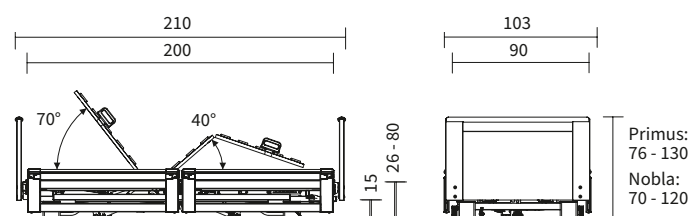

But beneath its attractive exterior lies sophisticated technology designed to make your life easier. The **electric height adjustment feature** moves you

effortlessly to a comfortable sitting position – perfect for reading, relaxing or simply starting the day at eye level with other people. If you need assistance, the bed will lower you to a safe height of **26 centimetres** to prevent falls and provide security.

Safe. Comfortable. Stylish.

- **Cosy not clinical:** optionally with upholstered headboards and footboards or faux leather panels
- **Convenience at the touch of a button:** quiet and precise adjustment of the height, backrest and leg section
- **Well-designed ergonomically:** protects caregivers' backs and makes everyday life easier
- **Flexibly adjustable:** the Easy Switch system enables the bed to change to keep pace with your needs

External dimensions/height adjustment range:

Elegant upholstery or an attractive wood decor, side panels or safety sides – as a double bed, the Regia spoils couples for choice.

Partner bed

Remaining at home together

Closeness, comfort and freedom – as a couple

With the Regia partner, couples enjoy their day-to-day life together – in a bed that fosters connection rather than restricting it. It looks like a stylish double bed but offers the features of two fully-fledged lifestyle and care beds. This means you can stay together even if one person requires assistance.

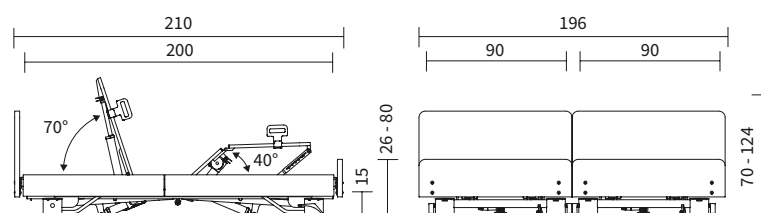

Each side of the bed can be adjusted individually: the **backrest**, **thigh rest** or **sitting position** can be adjusted independently of each other. While one person reads, the other can rest – but both enjoy a comfortable experience.

To permit care tasks or cleaning, the two halves of the bed can easily be separated and rejoined. This allows for flexibility while still retaining the familiar feel of the shared bedroom.

A bed that fosters closeness

- **Uncompromising togetherness:** share a bed, but adjust each half individually
- **Safe and adaptable:** safety sides and accessories allow adaptation to changing life circumstances
- **Easy handling:** easy to separate for care purposes or to re-arrange the room
- **High-quality appearance:** attractive design which adapts to every interior

External dimensions/height adjustment range:

- ▲ Effortless separation of the two bed halves makes it easier to provide care at the bedside and to clean the room.

Comfort that fosters togetherness

Life as a couple changes – but closeness, trust and a feeling of security remain. The Regia Partner bed ensures that these continue to underpin everyday life – shared moments of togetherness and individual freedom.

Its ample **height adjustment range of 26 to 80 cm** and flexible mattress bases create the perfect balance between comfort and safety. Synchronised raising and lowering prevents gaps from forming where limbs could get caught. Each side remains adjustable independently of the other – allowing everyone to find their favourite position for reading, resting or watching TV.

The **convenient working height** relieves the strain for caregivers and relatives, without sacrificing the familiar feel-good atmosphere. The bed remains attractive, stylish and ready for all living situations.

- ▲ Each half of the bed has its own remote control.

Technology that creates closeness

- Two mattress bases, each 90 × 200 cm, individually adjustable
- Height adjustment of 26 – 80 cm for safety and ergonomic working
- 225 kg safe working load per side – stable and durable
- Synchronous movement of the corpus of the bed prevents any entrapment hazard
- Optional safety sides for individual protection

- ▲ While the corpus of the bed always moves synchronously, the mattress bases can be adjusted individually.

- ▲ Raising the safety side at the head end offers an ideal balance between freedom and protection, while still meeting the relevant standards.

- ▲ Raised to the first level at the head end, the telescopic split safety side (TSG) is an orientation aid and enables users to get in and out of bed unassisted.

- ▲ Raising the safety side diagonally gives a reassuring feeling of safety.

- ▲ Residents at risk of falling are reliably protected by fully raising the safety side.

Safety sides

Protection that leaves room for freedom

Feeling safe helps you to stay active. That's why the Regia offers **modern safety sides** which provide protection without restricting your freedom of movement.

The **safety sides** are easy to attach and remove – offering versatility in everyday life. They help with getting up, provide a safe handhold when lying down but remain unobtrusive in appearance.

This creates an environment that provides safety and comfort – stylish, comfortable and reassuring.

- ▲ The optional full-length safety side (DSG) can be fitted in seconds using the Easy Click system.

Flexible - just like life itself

- **Two height levels:** for easy orientation or full protection
- Head-end protection makes it easy to **get in and out of bed**
- Optionally, also with full-length safety side for **maximum stability**
- **No-tool assembly** thanks to Easy Switch system

Whether you need more support right now or are becoming more mobile again – the Regia adapts to keep pace with you, not the other way round. This means every day is as free as possible and as safe as necessary.

- ▲ With the full-length safety side, residents at risk of falling enjoy maximum protection (image shows an example).

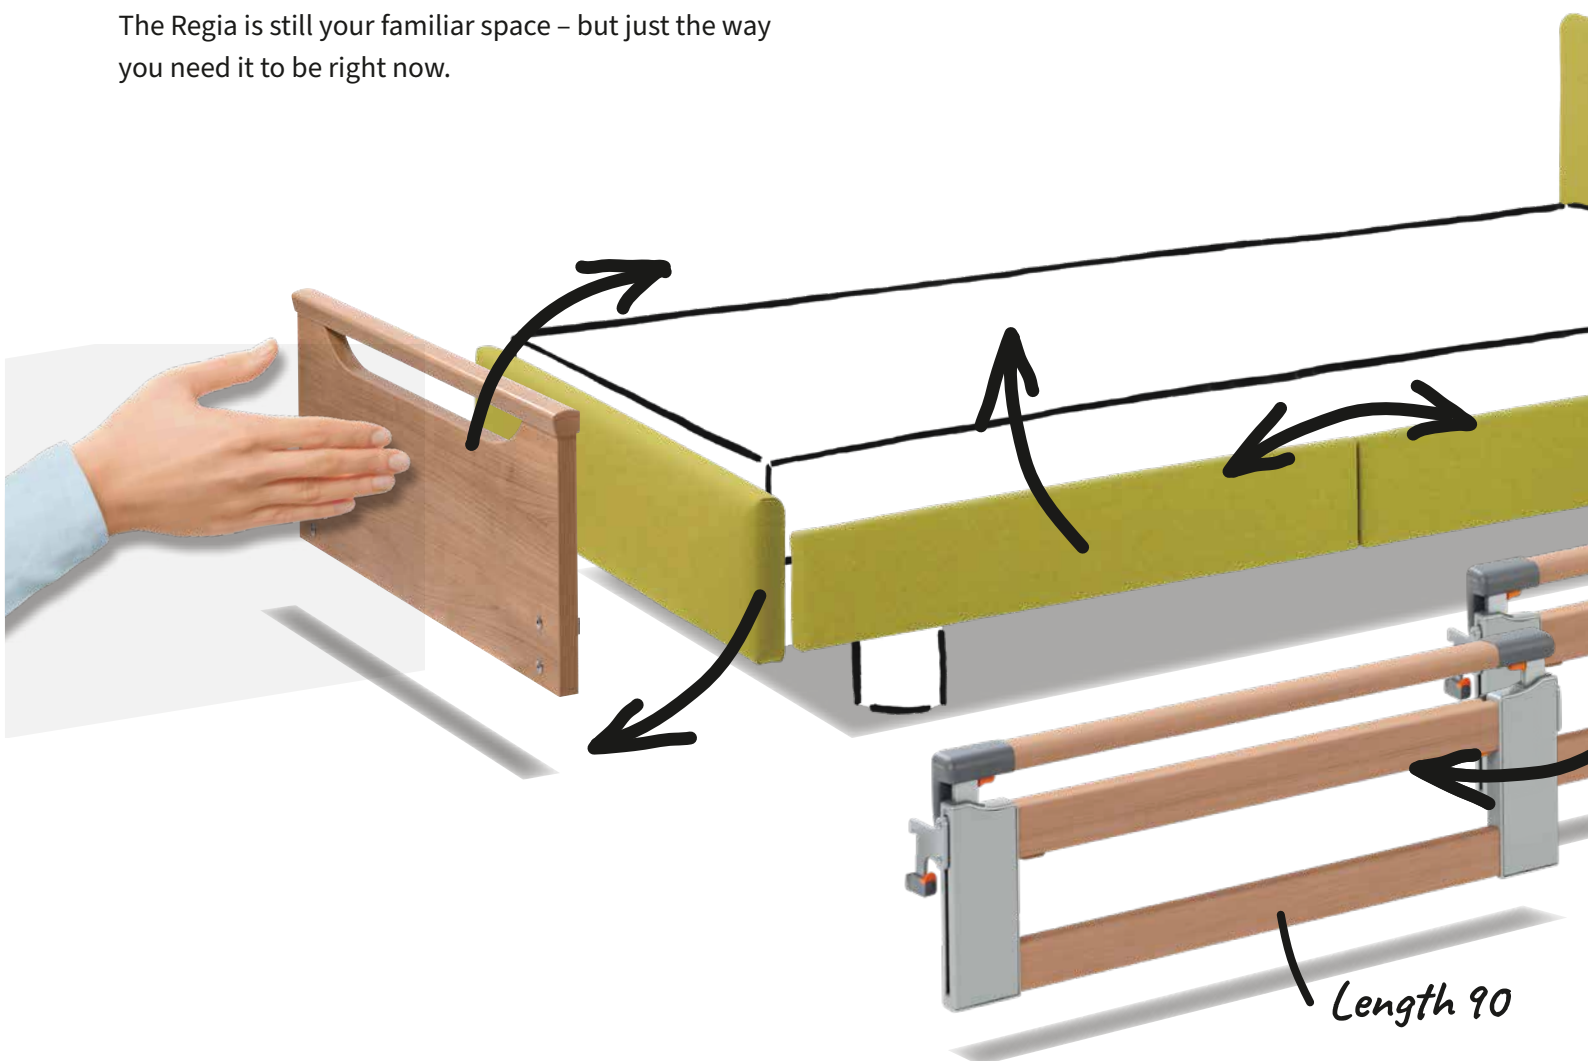

Remain flexible when life changes

Needs often change very gradually – but sometimes this can happen from one day to the next. The Regia bed accompanies you on every step of the journey. Due to its **Easy Switch system**, headboards and footboards, panels and safety sides can be replaced completely tool-free. Only a few easy steps and your bed adapts to new situations – whether you need greater support, more room for getting into bed or just yearn for a new look.

The Regia is still your familiar space – but just the way you need it to be right now.

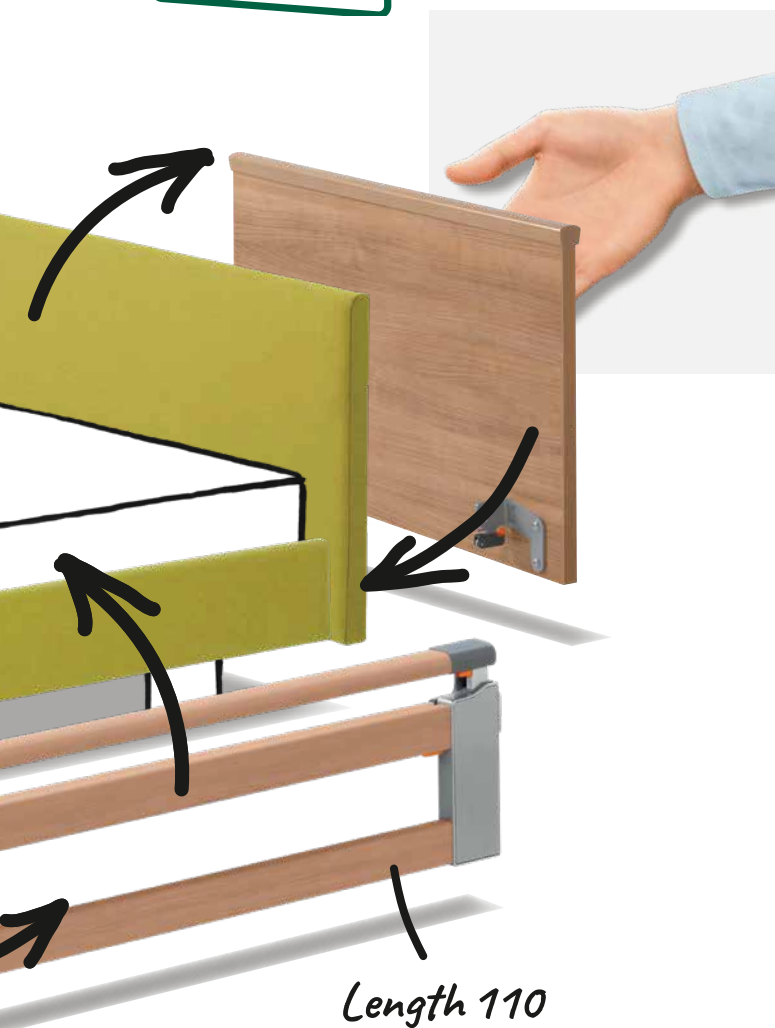

Thanks to the Easy Switch system, the Regia can easily be fitted at any time with safety sides or a new look and **adapted to your requirements**.

It becomes a bed that develops with you and supports you in every phase of your life. The **removable safety sides** are quick to convert to whatever care situation may arise.

**! Safety sides can be freely combined:
• 110/90 or 90/110**

Easy Switch

Easy Switch for added flexibility and safety

Beds with Easy Switch meet the different protection needs of residents and can be customised to suit any taste, without restricting the mobility of the person in need of care.

▲ All Easy Switch elements are inserted into the bed frame and attached with easy-to-operate locks.

▲ Simply press the fastener upwards.

▲ The lock snaps securely into place – and the element is attached.

▲ To release the fastener again, pull the orange safety catch towards you and press down on the lock.

The lowest position of only 26 cm protects against fall injuries.

Everyday comfort

Movement at eye level

Get up, live your life, be part of things – that's how easy it can be

A good bed is more than just a place to sleep – it's the centre of your day-to-day life. The Regia lets you enjoy every movement effortlessly – from sitting up, having breakfast with the family, watching TV to simply lying back and relaxing. The **flexible height adjustment** conveniently brings you to the ideal position – safely, smoothly and effortlessly.

The bed raises or lowers you in a gentle movement to a height of between 26 and 80 centimetres. The lowest position **helps to prevent falls**, while the ergonomic working height makes work easier for caregivers.

An automatic **intermediate stop at about 40 cm** ensures that getting into and out of bed is always safe and convenient.

The backrest can be raised to an angle of up to 70°, while the reverse-Trendelenburg position supports the circulation and makes for relaxed sitting – perfect for reading or for conversations at eye level.

The Regia is the ultimate blend of technology and emotion. It offers **freedom of movement**, wherever you need it, and peace and quiet whenever you wish – for a feel-good life on the move.

▲ The automatic intermediate stop at about 40 cm is the ideal height for many people to get in and out of bed.

▲ The ergonomic care height of up to 80 cm protects relatives' backs.

Enjoy everyday life with a new vitality

Comfort that fosters togetherness

- **Comfortable sitting position** for conversations, mealtimes or watching TV
- **Height adjustment from 26 to 80 cm** – safe and ergonomic in one
- **Soft-action backrest retraction** for greater comfort when sitting up
- Quiet, precise motors with **intuitive control**
- **Ergonomic care height** – protects the back of caregiving relatives

Mattresses

Comfort you can feel

Good sleep starts with the right feeling

Lying down in the Regia is the epitome of relaxation. The mattresses are designed to follow every movement gently – when reading, sitting up or resting. This means you enjoy **perfect support**, whether you are relaxing or receiving care.

▲ Sky-fit model with high-quality Skytherm® top layer.

Sky-fit – the premium model

For those who wish for maximum comfort and support. Dual-layer – a flexible Skytherm®-top layer and a firm cold foam base layer – to precisely follow the contours of the body and the mattress base. Ideal for discerning sleepers and extended care periods.

▲ Comfort-fit model with edge-zone reinforcement.

Comfort-fit – the mid-range mattress

Elastic cold foam, good support, noticeably soft yet firm. This mattress is the perfect solution for everyday comfort and is particularly suitable for persons who change their lying position frequently.

▲ Basic-fit model.

Basic-fit – the entry-level model

Straightforward, comfortable and hygienic. A sturdy single-layer mattress for reliable comfort – also ideal as an entry-level model.

▲ The **reading lamp** can be selected for insertion into the lifting pole sleeve or for attachment to the lifting pole.

▲ The **under bed light** provides better orientation at night and creates additional safety.

Accessories

Small details, big difference

Better comfort. Better safety. Better well-being in everyday life.

The Regia can be transformed with practical accessories into a tailor-made bed – for **greater safety, comfort and well-being** in everyday life. Every detail is designed to ease movement, provide orientation and make everyday life more convenient.

Examples

- **Under bed light** for safety at night
- **Standing aid** for easier lying down and standing up
- **Comfort mattress base** for pressure-relieving support
- **Bed extension** for additional space and flexibility
- **Reading lamp** for a pleasant source of lighting

This will transform your Regia into a bed that really fits your needs – at every stage of life.

With the flexible **transmitter holder**, ► the handset is always in the right place.

- ▲ The approximately 20 cm **bed extension** is simply inserted into the bed frame. Suitable mattress pieces to extend the mattress are also available.

- ▲ The **comfort mattress base** comprises 50 free-floating spring elements.

- ▲ The **pivoting standing aid** provides support when getting up and lying down.

- ▲ **Foam leather covers** protect against knocks to the safety side.

- ▲ With the 1.40 m **extension lead**, the handset can be used anywhere in the room.

- ▲ **Wall deflection rollers** protect the bed and room furnishings while moving or adjusting the height of the bed.
